

*(University of Choice)*

**MASINDE MULIRO UNIVERSITY OF  
SCIENCE AND TECHNOLOGY  
(MMUST)**

**MAIN CAMPUS**

**UNIVERSITY REGULAR EXAMINATIONS  
2020/2021 ACADEMIC YEAR**

**SECOND YEAR FIRST SEMESTER EXAMINATIONS**

**FOR THE DEGREE  
OF  
BACHELOR OF TECHNOLOGY EDUCATION (CIVIL AND  
STRUCTURAL ENGINEERING)**

**COURSE CODE: TEB 211**

**COURSE TITLE: THEORY OF STRUCTURES I**

**DATE: MONDAY 8<sup>TH</sup> FEBRUARY 2021 TIME: 9.00 – 11.00 AM**

---

**INSTRUCTIONS:**

1. This paper contains Five questions
2. Answer Any four **Questions**
3. Marks for each question are indicated in the parenthesis.
4. Examination duration is 2 **Hours**

MMUST observes ZERO tolerance to examination cheating

This Paper Consists of 4 Printed Pages. Please Turn Over.

**QUESTION ONE**

- (a) Determine the degree of static indeterminacy of the structures in Figure Q1 (a) (4 Marks)
- (b) For the arch shown in Figure Q1 (b) determine the:-
  - (i) Arch profile (3 Marks)
  - (ii) Reactions at the supports (4 Marks)
  - (iii) Moment, shear and Axial force at point E (6.5 Marks)

**QUESTION TWO**

- a) Identify key differences between cable and arch structures (3 Marks)
- (b) For the cable shown in Figure Q2, Determine the:-
  - (i) Vertical and horizontal force components in the cable at A and B (6 Marks)
  - (ii) Maximum tension in the cable (2 Marks)
  - (iii) Reactions at the top of the highest tower with a roller support system (6.5 Marks)  
(neglect the self-weight of the cable in the analysis)

**QUESTION THREE**

- (a) Show that the truss in Figure Q3 is statically determinate. (2.5 Marks)
- (b) Determine the reactions at the supports (3 Marks)
- (c) Determine the member forces (12 Marks)

**QUESTION FOUR**

- a) Define the terms 'free body' and 'influence line' as used in analysis of structures. (2.5Marks)
- b) For the Frame shown in Figure Q4, determine
  - (i) the reactions at the supports (9 Marks)
  - (ii) Draw shear force, axial force and bending moment diagrams. (6 Marks)

**QUESTION FIVE**

- a) Explain with example the relationship between loading, shear force and bending moment distribution on a beam. (2.5 Marks)
- b) A beam carries the load as shown Figure Q5
  - (i) Analyze the beam for reactions at the supports (9 Marks)
  - (ii) Draw the Shear force and Bending moment diagrams (6 Marks)
